Is Telehealth right for you?

DSN 314-590-4600

Telehealth Consultation

Your provider has made a consultation that can be facilitated using telehealth to see a specialist who is located at Landstuhl Regional Medical Center.

You will meet your provider using videoconferencing technology to connect you both so that you will not have to leave your home community. This will reduce the time, cost, and stress associated with travelling to an appointment.

What is a Telehealth visit?

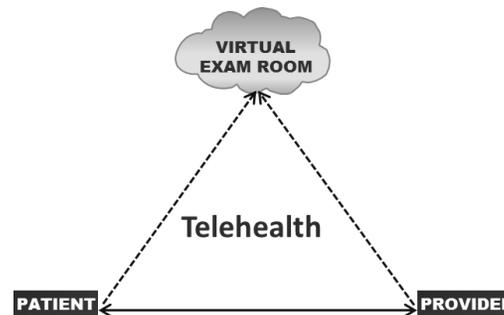

Telehealth uses video cameras and monitors to connect you with specialists who are not located near you, reducing the need to travel to receive care. You will be able to see, hear and talk to a doctor or other health care professional.

Is a Telehealth Consultation Appointment private?

Just like a normal doctor appointment, your telehealth consultation will be private and confidential. It can only be seen by the healthcare professionals involved. If you have any questions, please speak to your healthcare professional.

How does a Telehealth visit work?

A telehealth appointment is just like a normal appointment; only the specialist you will be seeing and speaking with is on a monitor. Before you arrive, the specialist you are going to see will already have relevant information about you to support your appointment. However, you may be asked to bring test results, medications, or x-rays with you. The telehealth patient presenter will be with you during your consultation to help facilitate the appointment. The videoconference connection is made with the specialist at a different location and the consult begins.

The telehealth patient presenter, if needed, will be with you to help assist with the examination; using tele-diagnostic equipment like a digital stethoscope, otoscope, or patient examination camera. The specialist on the monitor can hear your heartbeat and breathing and look into your ear, nose and/or throat, as though they are sitting in the same room.

How to book your telehealth appointment...

Contact the Regional Telehealth Department at the number listed on the brochure. You will be booked for two separate but corresponding appointment times, one for your primary care location and one for the specialty care provider.

Please arrive at your appointment 15 minutes ahead of the scheduled appointment time.
